The flavors and associated products that we develop are found in various spheres of your everyday life.

Beverages

Beverages account for a large portion of flavor consumption among the various application areas. We offer flavors suitable for numerous kinds of beverages including carbonated water-, fruit juice- and tea-based drinks.

Desserts, Sweets, Bakery

We offer flavors designed specifically for applications such as ice cream, jelly, candies, chocolate, pastry, bakery, etc. in addition to topping sauce- and jam-type bulk flavors, which we produce by taking advantage of Our fruit processing technology.

Tobacco

Flavor also plays an important role for cigarettes by creating the mild, rich taste that is unique to the more distinct tobacco and adds flavor and taste appeal for the smoker.

Food Coloring (Natural)

Food coloring substances are used with beverages, desserts, sweets, agricultural, dairy, meat, and fishery products. They help restore the original color of a substance that has faded during the course of processing or add an appetizing color that appeals to consumer taste and encourages purchase or consumption. Our product line has a wide range of colors including red, yellow, green, blue and orange available in liquid, powder or emulsion form for the convenience of application to a variety of uses.
