

BM-510

Banding Machine for PTP blister collations

Features

- The accumulated PTP blister are banded tightly in film (CPP).
- A rigid machine structure and grooved cam drive operation ensures very smooth machine movement.
- Designed especially for ease of operation.

Specifications

For PTP Sheet items

Adhesion method	Overlap style heat seal
Wrapping material	CCP thickness 30-40 μ width 30-40 mm
Product Size(standard size)	W : 85mm/max H : 60mm/max L : 135mm/max *Please consult for other special size.
Compressed air	0.5MPa 50Liter/mm(ANR)

Bunch Number	7-10 sheet
Power	3PH 200V 3KVA
Machine weight	Approx. 500kg
Standard equipment and devices	Automatic film splicer, splice detection and reject device, seal defect detection and reject device

*Specifications are subject to change depending on product and pack characteristics.
